Breakthroughs that change patients' lives

For Medical Doctors, Clinics & Private Hospitals

Our Core Values

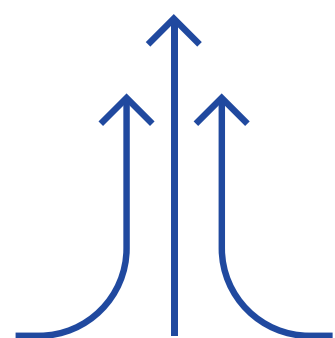

Think big
Speak up
Be decisive

Courage

Breakthroughs start by challenging convention— especially in the face of uncertainty or adversity.

This happens when we think big, speak up, and are decisive.

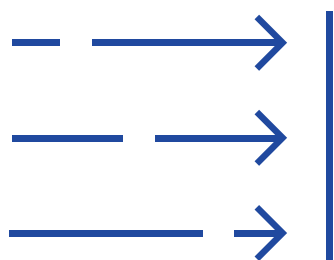

Focus on what matters
Agree who does what
Measure outcomes

Excellence

We can only change patients’ lives when we perform at our best together.

This happens when we focus on what matters, agree who does what, and measure outcomes.

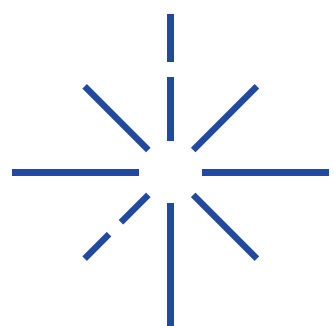

Be inclusive
Act with integrity
Reduce healthcare disparities

Equity

Every person deserves to be seen, heard, and cared for.

This happens when we are inclusive, act with integrity, and reduce healthcare disparities.

Take pride
Recognize one another
Have fun

Joy

We give ourselves to our work, and it also gives to us.

We find joy when we take pride, recognize one another, and have fun.

Staquis™

crisaborole ointment 2% w/w

FIRST STEROID-FREE TOPICAL PDE4 INHIBITOR¹

in Hong Kong for the treatment of mild to moderate atopic dermatitis²

- 2** times daily to affected areas², no limit to sensitive areas^{*3}
- 4** days to reduce pruritus^{4,5}
- 8** days to achieve ISGA success^{2,6}
- 29** days >30% patients achieved an ISGA success of clear (0) or almost clear (1)^{2,6-9}
- 48** weeks treatment period 77.8% patients did not require the use of a TCS/TCI¹⁰

STAQUIS™ Summary of Product Information

1. TRADE NAME: STAQUIS™ **2. PRESENTATION:** Ointment: 20 mg of crisaborole per gram (2%) of white to off-white ointment. **3. INDICATIONS:** STAQUIS is indicated for topical treatment of mild to moderate atopic dermatitis in adult and pediatric patients 3 months of age and older. **4. DOSAGE:** Apply a thin layer of STAQUIS twice daily to affected areas. STAQUIS is for topical use only and not for ophthalmic, oral, or intravaginal use. (Please refer to the full Prescribing Information for details). **5. CONTRAINDICATIONS:** Patients with known hypersensitivity to crisaborole or any component of the formulation. **6. WARNINGS & PRECAUTIONS:** Hypersensitivity reactions, including contact urticaria, have occurred in patients treated with STAQUIS. Hypersensitivity should be suspected in the event of severe pruritus, swelling and erythema at the application site or at a distant site. If signs and symptoms of hypersensitivity occur, discontinue STAQUIS immediately and initiate appropriate therapy. (Please refer to the full Prescribing Information for details). **7. INTERACTIONS:** Metabolite 2 (5-(4-cyanophenoxy)-2-hydroxyl benzoic acid) showed moderate inhibition of UGT1A9 and may result in a moderate increase of the concentrations of sensitive UGT1A9 substrates. Metabolite 2 is expected to inhibit breast cancer resistance protein (BCRP) at therapeutic concentrations. (Please refer to the full Prescribing Information for details). **8. PREGNANCY AND LACTATION:** There is no available data with STAQUIS in pregnant women to inform the drug associated risk for major birth defects and miscarriage. There is no information available on the presence of STAQUIS in human milk, the effects of the drug on the breastfed infant or the effects of the drug on milk production after topical application of STAQUIS to women who are breastfeeding (Please refer to the full Prescribing Information for details). **9. SIDE EFFECTS:** Adverse effects include application site pain and allergic contact dermatitis (Please refer to the full Prescribing Information for details). Reference: Hong Kong PI (version date/LPD date) June 2020. Date of preparation: APR 2022. Identifier number: STAQ0422. **FULL PRESCRIBING INFORMATION IS AVAILABLE UPON REQUEST.**

*STAQUIS™ (crisaborole) is for topical use only and not for ophthalmic, oral, or intravaginal use. *Success is defined as an ISGA score of Clear (0) or Almost Clear (1) with a 2-grade or greater improvement from baseline. PDE4=phosphodiesterase 4; ISGA=Investigator's Static Global Assessment; TCI=topical calcineurin inhibitor; TCS=topical corticosteroid
